Hump Magnet Bulletin # HMB-08

Ibis, Inc. USA Pneumatic System Hump Magnets are Ideal for ferrous metal in pneumatic or gravity system. These separators are adaptable to either round pipe or rectangular duct conveying lines. The Hump Magnets employs two heavy duty plate magnets, which are positioned so that the offset flow of material flow through the hump is forced into the hump housing for maximum product and dust contact .

They are used in the hygienic product, nonwoven, plastics, textile and other industries to remove ferrous fines, as well as large pieces of tramp iron from many types of dry particulate or clumpy, hard to flow material.

Features:

- Easily installed
- Highly effective and consistent performance due to high magnetic flux density
- Easily remove captured metal, manually.
