

EXPANSION OF IBIS BUILDING...

Ibis expands again! We have been renting space near our main building to better facilitate the crating, and loading of our equipment for the last year. As business continues to grow we are once again expanding our facility in Hoschton with the addition of a new shipping / receiving building. Thank you to all of our loyal customers for helping us grow.

EC-1000 CYCLONE

We have been busy in R&D designing and testing a new High Efficiency cyclone for our customers who do not return the dust vacuumed from the Drum Filter media back to the production line. The XQ design cyclone we have used in the past was approximately 85% efficient at removing this dust from the airstream. Our new EC series cyclones have tested at 95% efficiency. This means a 10% reduction in the fine dust particles being returned to the filter and therefore an extension of your drum filter's media life. Contact us for a full report and to discuss the advantages it could provide to your production uptime.

IBIS PARTNERS WITH KAYSON

Ibis International will supply state of the art Process Air Filtration Systems for the production lines at Foshan Kayson in China during 2015. Ibis is proud to partner with Kayson to help them move in a positive direction of an improved quality product.

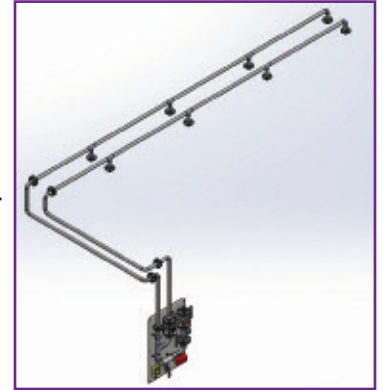

BROTHERS IN ARMS

Ed "Doc" Pepping (L) and Al Mampre (R) first met in 1942 at camp Toccoa, GA where they were in Easy co., 506 PIR, 101st Airborne (Band of Brothers). Ibis and Jaeger were proud to sponsor these two screaming eagles at this year's Currahee Military Reunion.

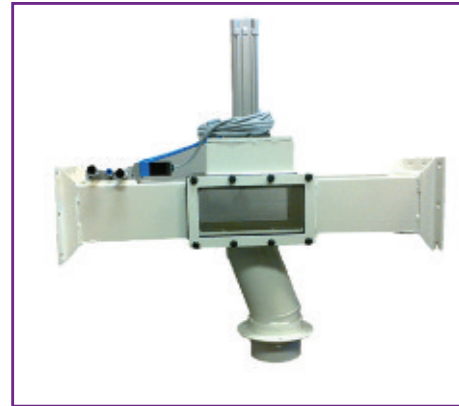

FUSED HEAD SPRINKLER SYSTEM

Fused head sprinkler system We at Ibis know how important fast installation times are, and therefore have designed a new fused head sprinkler system with all sprinkler heads being pre-welded and assembled. Contact Ibis for Details.

POPPET VALVE

The Ibis Poppet Valve is designed to control the flow of air and material through a duct network by providing a smooth flow of fibrous material in both directions and in pressure/suction systems."

Website Updates

The Ibis website has recently been updated to allow for easier access to important information such as technical bulletins, manuals, and technical drawings. Stop by www.ibis-usa.com today for all your process air filtration needs!
